

Internship Curriculum

◇ Purpose of the Internship

1. To deepen participant's understand of Japanese electric power industry by taking examples of Kansai Electric Power Company (KEPCO).
2. To gain insight into an international electric power situation and business by knowing the overseas business and activities of KEPCO.

◇ Duration

2014/02/17~2014/03/07 (3weeks)

◇ Concrete plan of Curriculum

The participants have lectures about above-mentioned no.1 and no.2 and visit power plants or facilities to help understand lectures.

The participants also survey and research regarding the contents of lecture and give a presentation. Time for discussion and questions with KEPCO members is also provided.

1. About Overall Business of KEPCO

Lecture

- Outline of KEPCO
- Characteristic of electric power industry
- Japanese electric power industry
- Our approach to renewable energy

Site visit

- Power plant (Nuclear, Thermal and Hydro)
- Training center (Engineering training center, career development center etc.)
- Renewable energy plant (Mega solar power etc.)

2. About International Business of KEPCO

Lecture

- Outline of KEPCO's International business
- Management and evaluation of the international business
- International cooperation activities

Talk session with overseas workers

- Discussion with our workers who work at Paris office or overseas sites)

3. Assignment (research and presentation)

The participants study and give a presentation about the topic which is determined between participants and KEPCO on the first week. (e.g. The present situation and issues of the electric industry in your country and the future policy needed to be taken)

◇ Others

- * This curriculum is a tentative and the detailed schedule will be given later.
- * The language used in lectures and presentation is mainly English.
