

Important Notes for April Enrollment

- April enrollment is only for Japanese nationals and for non-Japanese nationals, who, at the time of application, have a visa valid through the end of March 2020 that allows applicants studying in Japan.
- Check your program eligibility carefully before choosing your program since the questions in “Additional Information” in the “Application” tab vary depending on the program.
- If you find yourself that you are not eligible for April Enrollment after choosing MPPIP-2020, you can change your program to MPPIP-2010 (September Enrollment) during the application period. Upon withdrawal from MPPIP-2020, you can choose MPPIP-2010 to apply. However, please note that you need to start over the online application forms from the beginning except for “Registration” tab and “Educational Background” page in the “Application” tab.
- If the Admissions Committee finds that you are ineligible for April enrollment after your completing the online application, you will automatically be considered for September enrollment.
