

## KEPCO's Internship Program in 2015

### **Purpose of the Internship**

KEPCO expects interns to acquire an insight of Japanese power industry from the perspective of a utility. Interns will be able to utilize hands-on experiences such as visiting company's facilities or interacting with employees for their academics and careers in the future.

### **Curriculum**

The program will provide interns with both lectures and site visits. Interns will be assigned to do researches related with energy topics and give presentations as well.
